**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 17 September 2001.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 14 remain indefinite in that it is unclear if or how the upper limit of "about 99.5 weight%" defining component I limits the polymer blend because its use exceeds 100 weight% of the composition. In this regard, it is noted that the lowest amount of component II is "about 2.1 weight %".

Claim 4 is indefinite because it is unclear how the additional dicarboxylic acid component can comprise up to "about 20 mole %" of the total dicarboxylic acid given that the latter must comprise "at least 85 mole %" of the dicarboxylic acids recited in the base claim.

### ***Claim Rejections - 35 USC § 102/103***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 93/21047, WO 98/39388 or WO 97/15629 as per reasons of record.

The compositions disclosed by the references meet the requirements of the present claims both in terms of the types of materials added and their contents. Accordingly, it is reasonable to expect that the compositions of the reference meet all characteristics defining applicants' invention.

#### ***Response to Arguments***

5. Applicant's arguments filed September 17, 2001 have been fully considered but they are not persuasive.

It is applicants' main contention that the references do not anticipate the claims of the present invention because they disclose up to 2 weight percent of polyamide whereas the present claims recite an amount of polyamide of from about 20 to about 2.1 weight percent. It is maintained, however, that the presently claimed lower limit of "about 2.1", by virtue of the relative term "about, includes the references' upper limit of 2 weight percent. Thus, the references anticipate the claimed invention. This position is further buttressed by the fact that the present claims, by reciting an upper limit of "about 99.5" weight % for component I, implicitly recite a complementary amount of "about 0.5" weight % of component II. Components I and II must total 100 weight % of the polymer blend.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1711

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
